

Heavenly Blend Coffee™

A cup of the best coffee you'll ever drink!
Our Tarrazu coffee beans are the best quality that Costa Rica has to offer. The altitude, soil, water, and climate are the key 'factors' that create each coffee's individual flavor. Our Tarrazu coffee beans are shade-grown on bird-friendly farms, and are naturally organic.

Our coffee has a well-balanced, full-bodied flavor, followed by a smooth finish without the bitter aftertaste you sometimes find in other coffees. The flavor and aroma of our coffee are true testaments to the pristine soil and cool mountain water that goes into every bean grown by the farmers of Costa Rica. We think Beneficio Coffee™ is simply the best coffee you will ever taste.

We currently offer three different roasts - **Full City**, **French**, and **Decaf** and each are available in either whole-bean or ground (there's never an extra charge for grinding). Our roast process is what gives our coffee its flavor, aroma, body and acidity. We roast our coffee every week in small batches so your coffee is always consistently delicious and fresh.

Full-City Roast

Our **Full City** Roast is a medium roast which produces a brew that is smooth and full of flavor. People who desire a mellow taste followed by a sweet finish choose our Full City Roast.

French Roast

Our **French** Roast is a dark roast that produces a rich, somewhat smoky flavor. People who enjoy a more robust flavored coffee choose our French Roast.

Decaffeinated

Our **Decaf** (Columbian) coffee is roasted between a Full City and French roast profile, creating a medium roast coffee to obtain the richest, fullest flavor possible. Even people who don't like the taste of other decaf coffees love our Decaf Roast.

Whatever roast you choose...you can be sure that you are receiving the freshest, finest gourmet coffee that Beneficio has to offer.

What's more ~ with every purchase you make you are giving back to communities globally through Beneficio's unique GiveBack programs.
